

Change password: change Payout Banking access password

The screenshot shows the Payout+ user interface. On the left is a navigation menu with options: company, Balance, Accounting, Ledger, Customers, Documents, and Settings. The main content area is titled 'Profile' and contains fields for E-mail, First name, Last name, and Phone. Below these is a 'Password' section with a 'Change password...' button. Underneath is a 'Two-step authentication' section with a status of 'Enabled', a 'Type' dropdown set to 'Authenticator', and a 'Current password' field with a 'Confirm' button. At the bottom is a 'Verification' section with an 'OTP' field containing '318029', a 'Password for verify' field, and a status of 'Saved'. A user profile dropdown in the top right corner shows 'Profile' and 'Logout' options.

You can change the access password in **Profile => Password => Change Password.**

A strong payment account security password is essential to protect your funds and personal information from unauthorized access and misuse.
